Poor	1	0	0%

**Please comment on the quality of the precepts. How did they contribute to your learning in the course? To what extent did the preceptor raise challenging questions, help clarify course material, and encourage broad student participation? Was the preceptor responsive to students' questions, opinions, and criticism?**

### Comments

Tanika was a fantastic preceptor! She was so available, and always was very understanding in office hours. One of the best preceptors I've ever had here!!

Tanika's the best! She was a fantastic preceptor who always was prepared to discuss the material at hand, and was great about answering our questions and making sure that the entire class was engaged.

Precepts were great, I think Tanika made a continued effort to prepare us for the work we had to do, and kept us engaged. She's a lot of the reason I got so much out of this course.

tanika was incredible she worked so hard and was always around to help out and give feedback and meet. she explained very clearly and was the best preceptor i could have asked for!

Sometimes, especially towards the end, there wasnt a point in going. Like I still went but I felt like it was busy work.

### Comments

Tanika was really great. She was quick to respond to emails outside of class and had an easy way of teaching less intuitive material (e.g., random/fixed/mixed effects).

Tanika is a gem and such a generous educator. While sometimes her command of the topics we discussed seemed questionable, her cheery disposition and empathetic education style lent themselves to a positive learning environment.

I thought the precepts were really helpful! I liked that they were all directly relevant to the problem sets. And that sometimes, they expanded on concepts from lecture a bit more deeply.

Tanika was great. Super nice and super helpful.

Tanika was tremendously helpful throughout the year and was very responsive to any issues I had. Precepts really built upon lectures tremendously well and Tanika was very receptive and understanding of individual circumstances as well. With all the work she had on her plate this semester as well, she maintained a great level throughout all precepts.

Tanika was awesome. Super helpful and knowledgeable!

Tanika was really good and helpful, explaining things whenever I had questions in detail.

I really liked the precepts and thought they were both informative and very practical. I felt that I was in a much better place to do the problem sets after the precept because we went over specific examples of how to interpret tables and walked through each thing that we were doing. I also liked how we went over why and when you use certain procedures. The handouts were also very easy to follow and having that as a reference while doing the assignments was very helpful.
